ALFA PROFESSIONAL OVENS

QUICK Series

The Quick Series of professional pizza ovens combine extraordinary performance and a small size. Compact, easy to install and easy to move around, they offer the same productivity as traditional ovens, but require minimum space.

QUICK 2 PIZZE

Lightweight and compact, it is a professional pizza oven ideal for use in food trucks, small shops and gluten-free shops.

QUICK 4 PIZZE

Impeccable performance and low weight make Quick 4 Pizzas perfect for fast food restaurants, catering services and bistros that want to include pizzas in their menu.

QUICK 6 PIZZE

Maximum productivity and high performance make this professional oven the best ally for pizzerias and restaurants with many seats.

ALFA FORNI

Lightweight, quick and easy to install professional pizza ovens

Thanks to their various sizes and 3 fueling methods, wood, gas or hybrid, the Quick Series professional pizza ovens are capable of meeting the needs of multiple catering activities.

Food trucks, small shops and bistros that want to add pizzas to their menu, or pizzerias with a high hourly production, can find the most suitable solution for their spaces and production needs with the Quick Series.

Alfa professional pizza ovens are immediately ready for use. They do not require masonry works and are so small that they can fit through standard doors found in normal premises.

DESIGN & PERFORMANCE

Double Flue System for a superior cooking experience.

The patented Alfa Double Flue System maximizes heat while minimizing fuel consumption and reduces the temperatures in the pizza maker's work area by 20%.

Thanks to two special draft hoods, the heat remains longer in the cooking chamber, increasing the well-being and safety of the pizza makers and offering an unbeatable cooking performance while respecting the environment.

Once the ideal location has been chosen, the Quick pizza ovens are immediately ready to be used.

In just a few minutes they reach up to 500°C, allowing pizza makers to cook tasty Neapolitan and contemporary pizzas, both quickly and evenly, combining performance and productivity thanks to the refractory top, which is 5 cm thick.

The Quick Series stands out for not only for its low consumption, but also its low operating costs. In particular, the gas-powered models are such that staff do not have to continuously check the oven, thus allowing them to dedicate valuable time to other tasks.

DESIGN & PERFORMANCE

3 types of fuel to choose from

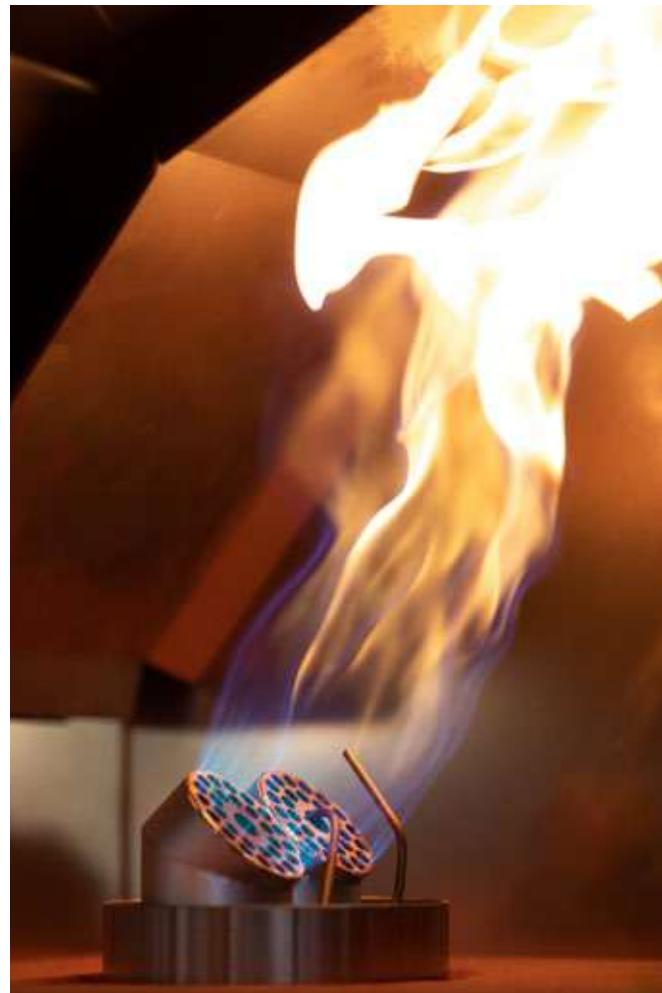

Wood

High-quality materials and construction technology make Alfa professional wood-burning ovens highly efficient with very fast lighting and preheating times along with low wood consumption.

2 Gas

Latest generation burners and patented Alfa technology allow gas-powered models to quickly generate heat and keep it constant with maximum precision and efficiency.

Gas-fuelled versions do not require a flue, just a simple suction hood found in all professional kitchens is sufficient.

3 Hybrid

Thanks to the practical Hybrid Kit developed by the Alfa R&D team, the gas oven can be transformed into a wood-burning oven, allowing to decide from time to time which fuel to use according to the needs of the moment.

So many benefits in so little space

Ready to use

Does not require masonry work and is immediately ready to churn out pizzas that are consistently cooked to perfection.

Weather resistant

The high quality double powder coating makes the Quick Series ovens perfect for outdoor installations as well.

Built-in Installation

Alfa professional pizza ovens can be installed in built-in mode, taking care to leave adequate space for maintenance.

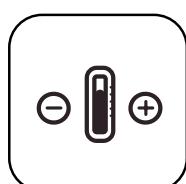

Reduced consumption

Alfa technology, innovation and optimized design offer concrete fuel savings without ever giving up on high cooking performance.

Cooler environments

Thanks to the double front-suction hood, the Quick Series ovens reduce the heat perceived by the pizza maker by 20%.

Digital thermometer

A convenient and practical digital thermometer enables a quick view of the temperature inside the cooking chamber and an even more precise handling of the oven.

DESIGN & PERFORMANCE

Maximum freedom of customization

In addition to the size and type of fuel supply, the Quick Series ovens can be customized with a wide range of colors and finishes so that they can be perfectly integrated with the style of any setting, even the most particular of rooms.
